## EDUCATION

<b>University of Massachusetts - Dartmouth</b> Master of Science in Data Science   GPA: 4.0/4.0	<b>Aug 2022 - present</b> Dartmouth, Massachusetts
<b>BMS Institute of Technology and Management</b> Bachelor of Engineering in Telecommunication Engineering	<b>Aug 2015 - Jul 2019</b> Bengaluru, India

## SKILLS

<b>Languages</b>	Python, SQL, JavaScript.
<b>Web Development</b>	Django, Django Rest Framework, Celery, GraphQL (Ariadne), JavaScript (DOM manipulation, AJAX), D3.js, HTML/CSS, Unit Testing with Django (Pytest), JWT, Unicorn, Nginx.
<b>Machine Learning</b>	TensorFlow, Keras, PyTorch, XGBoost, OpenCV, Pandas, NumPy, Scikit-learn, Matplotlib.
<b>Big Data &amp; Cloud</b>	Amazon Web Services (AWS), Microsoft Azure, PySpark, Apache Kafka, Hadoop, Airflow, Hive.
<b>Database</b>	PostgreSQL, MySQL, DynamoDB, MongoDB, Neo4J, Redis.
<b>DevOps &amp; Tools</b>	Git, GitHub Workflow, GitLab - CI/CD, Docker, PEP 8 (Python Code Style), Postman.

## TECHNICAL EXPERIENCE

<b>Capstone Project (in Collaboration with U.S. Fish &amp; Wildlife Service)</b> University of Massachusetts Dartmouth	<b>Jan 2024 - present</b> Dartmouth, Massachusetts
<ul style="list-style-type: none"><li><b>Large-Scale Fish Video Analysis</b>   Django ORM, REST API, Docker, OpenCV, Celery, Redis, AJAX<ul style="list-style-type: none"><li>Processed <b>20,000+ fish videos</b> for <b>species identification</b> and length measurement, <b>achieving 94% accuracy</b> and reducing manual analysis time by over 80%.</li><li>Built a <b>scalable Django web application</b> for <b>concurrent processing</b> of up to <b>100 videos</b> with real-time updates via <b>AJAX</b>, enhancing user experience.</li></ul></li></ul>	
<b>Associate Backend Developer</b> Metalab Innovation LLP. (QNIX)	<b>Sept 2019 - Jul 2022</b> Bengaluru, India
<ul style="list-style-type: none"><li><b>Lead Developer: Qelza - Work Management Solution</b>   Django, ORM, EC2, Git, CI/CD, Docker, GraphQL (Ariadne), PostgreSQL<ul style="list-style-type: none"><li><b>Spearheaded a team of 5 developers</b> using <b>Agile methodologies</b> to complete Qelza's backend development with Django, delivering on-time and within budget for Happi Mobiles.</li><li>Architected a highly efficient <b>GraphQL API schema</b> for Qelza, resulting in a <b>35% improvement</b> in data querying and manipulation compared to the previous REST API streamlining the development process and enabling complex data interactions.</li><li>Deployed <b>GitLab CI/CD pipelines</b> for continuous integration and deployment, and containerized the application using <b>Docker</b> for enhanced scalability, reducing <b>deployment times by 23%</b>.</li><li>Developed and implemented a comprehensive <b>testing suite</b>, achieving a <b>50% reduction</b> in post-deployment issues.</li><li>Maintained comprehensive <b>API documentation</b>, boosting team <b>productivity by 25%</b>.</li></ul></li><li><b>Deep Learning Engineer: Advanced Camera Analytics</b>   TensorFlow, Apache Airflow, Quicksight, Triplet loss, Parallel Computing<ul style="list-style-type: none"><li>Engineered a YOLO-based deep learning algorithm with <b>parallel processing</b>, achieving <b>95% person detection accuracy</b> and a <b>2.4x speedup</b>, improving efficiency by 30%.</li><li>Implemented <b>triplet loss for face clustering</b>, resulting in a 15% reduction in false positives and a 20% improvement in identification accuracy, ultimately achieving an <b>87% recognition rate</b>.</li><li>Optimized and maintained an <b>Airflow scheduler</b>, automating and efficiently managing cron jobs, <b>saving approximately 2 hours daily per engineer</b>. This ensured seamless and timely operations of critical processes.</li></ul></li><li><b>Large Scale Tattoo Detection System</b>   Django, PyTorch, S3, EC2, Lambda, YOLO, OpenCV, Docker<ul style="list-style-type: none"><li>Created a tattoo detection system with 91% accuracy using YOLO and PyTorch, showcasing efficient object recognition.</li><li>Improved UX with a user-friendly Django API and secure <b>OTP-based login</b> using <b>Django Passwordless</b>, improving user experience.</li></ul></li></ul>	

## PROJECTS

<b>Data Processing &amp; Storage Pipeline for E-Commerce Behavior Data</b>   Apache Kafka, PySpark, Tableau	<b>Sept 2023 - Dec 2023</b>
<ul style="list-style-type: none"><li>Designed, developed, and deployed a scalable <b>ETL data ingestion pipeline</b>, efficiently handling <b>&gt;100GB</b> of e-commerce data.</li><li>Built a Kafka-powered data streaming pipeline handling <b>5,000 user actions per second</b> in real time.</li></ul>	
<b>Customer Segmentation Clustering</b>   Unsupervised Learning, PCA, Elbow Method	<b>Sept 2022 - Dec 2022</b>
<ul style="list-style-type: none"><li>Leveraged k-means and Agglomerative clustering to identify 4 distinct customer segments based on purchasing behavior, including high-value spenders and budget-conscious buyers.</li><li>Produced actionable insights for <b>four customer clusters</b>, aiding in the creation of <b>targeted marketing strategies</b>.</li></ul>
